

ABIDIT GOGOI

Jorhat, Assam | +91 9395697221 | abidit.gogoi01@gmail.com | LinkedIn

PROFILE SUMMARY

Ambitious B.Tech Computer Science student specializing in Frontend and Software Development. Proficient in building secure, full-stack web applications with a focus on PHP and SQL. Demonstrated expertise in creating AI-integrated proctoring systems and analyzing complex IT infrastructure. Committed to applying core software engineering principles to develop clean, scalable, and efficient code that optimizes user experience and system performance.

TECHNICAL SKILLS

Frontend:	HTML5, CSS3, JavaScript (ES6)
Backend:	PHP, SQL (MySQL)
Tools:	VS Code, Git, GitHub, Chrome DevTools
Core CS:	DBMS, OOPS, Data Structures & Algorithms, Computer Networks

EDUCATION

Dhemaji Engineering College

Bachelor of Technology in Computer Science & Engineering

Expected 2026

Dhemaji, Assam

PROFESSIONAL EXPERIENCE

Numaligarh Refinery Limited

IT Infrastructure Intern

July 2025

Assam

- Analyzed large-scale enterprise data center architecture and industrial networking protocols.
- Evaluated SAP ERP system integration and observed real-time IT infrastructure maintenance cycles.
- Gained insight into industrial-grade network security and enterprise data flow management.

Jorhat Engineering College

Machine Learning Intern

June 2024 – July 2024

Jorhat, Assam

- Studied computer vision fundamentals and machine learning model training lifecycles.
- Developed conceptual workflows for face recognition and identity verification systems.
- Collaborated on implementing logic for real-time visual data processing and feature extraction.

KEY PROJECTS

Smart Test System (AI Proctoring)

PHP, SQL, JS, AI

- Engineered a full-stack examination portal featuring AI-based voice and face detection modules.
- Developed backend logic to monitor user behavior and mitigate academic malpractice in real-time.
- Integrated secure administrative dashboards for system monitoring and automated result processing.

Online Examination System

HTML5, CSS3, PHP, SQL

- Developed a web-based examination platform for automated student assessment and record management.
- Implemented secure session management and multi-user authentication protocols using PHP.
- Architected SQL database schemas to manage high-volume question banks and performance analytics.

ACADEMIC ACHIEVEMENTS & INTERESTS

- **Core Interests:** Scalable Software Architecture, Modern Frontend Frameworks, Distributed Systems.
- **Specialized Training:** Practical proficiency in AVL Trees, DBMS optimization, and OOP design patterns.
